

NGUYEN THANH TAM

MIDDLE BACKEND DEVELOPER

Ho Chi Minh City | 0941 346 209 | tamtnts@gmail.com
github.com/tamtnts | linkedin.com/in/tam-nguyen-thanh-338983260

PROFESSIONAL SUMMARY

Backend developer building maintainable REST APIs and data-intensive services for logistics operations. Experienced with service integration, asynchronous processing, database access, caching, operational search, and document workflows. Focused on clear service boundaries, reliable data flows, and practical production support.

CORE SKILLS

Backend Java 17, Spring Boot, REST, gRPC, OpenFeign	Data Oracle, PostgreSQL, MongoDB, Elasticsearch	Messaging and Cache Kafka, Redis, EMQX / MQTT
Infrastructure Kubernetes, Rancher, Nginx, Linux	Delivery GitLab CI, Docker, Grafana, MinIO / S3	Additional Netty / TCP, ShedLock, PDF generation

PROFESSIONAL EXPERIENCE

Middle Backend Developer | GTEL OTS

Aug 2024 - Present

- Develop and maintain REST APIs for vehicle lookup, journey data, operational statistics, and record exports.
- Design relational database structures, indexes, and queries for operational workloads.
- Build Kafka consumers and synchronization workers for reliable asynchronous processing.
- Use Redis for caching, temporary coordination state, rate limiting, and distributed locking.
- Integrate internal services through gRPC and REST, normalizing contracts across boundaries.
- Support Elasticsearch-backed search and template-driven PDF or document workflows.

Backend Developer Intern | FPT Software Academy

- Contributed to a Spring Boot training-management application by designing database structures, implementing CRUD features, testing, and fixing defects.

EDUCATION

FPT University, Ho Chi Minh City
Software Engineering - Good

2019 - 2023

SELECTED PROFESSIONAL WORK

Fleet Operations Platform - Three connected backend services supporting operational workflows, administration, synchronization, search, and reporting. Project names and boundaries are generalized to protect confidential production details.

Fleet Operations Core

Central service for fleet workflows, interactive lookup, operational statistics, service integration, and document generation.

- Developed REST APIs, relational queries, and workflow-oriented use cases.
- Integrated related services through REST and gRPC and contributed to Kafka event paths.
- Applied Redis for explicit cache and short-lived workflow state.

Stack: Java 17, Spring Boot, REST, gRPC, Kafka, Redis, Elasticsearch, Docker

Fleet Administration and Dispatch

Administration service for planning, resources, devices, configuration, and operational coordination.

- Developed APIs and validation for planning, resource, device, and configuration flows.
- Worked on lifecycle and assignment-state queries, caching, and coordination.
- Supported event integration, service-to-service calls, reports, and exports.

Stack: Java 17, Spring Boot, REST, gRPC, Kafka, Redis, ShedLock, Docker

Fleet Data Intelligence Hub

Read-oriented service for multi-source synchronization, aggregation, operational search, and normalized lookup.

- Built synchronization workers and Kafka consumer flows for approved data sources.
- Developed lookup and aggregation APIs with REST and gRPC boundaries.
- Worked on Elasticsearch query paths, data processing, and integration-state handling.

Stack: Java 17, Spring Boot, Kafka, Elasticsearch, MongoDB, gRPC, Docker

EARLIER PROJECTS

Academic Blog at FPTU - Led team delivery, coordinated documentation, designed the database, and implemented backend APIs. (ASP.NET REST API, SQL Server)

FPT Software Academy Training Management System - Designed database structures, implemented CRUD features, tested functionality, and fixed defects. (Spring Boot, MySQL)

Contract Management System - Contributed to database and REST API design, built full-stack features, and supported deployment. (ASP.NET REST API, React, SQL Server)

CERTIFICATIONS AND LANGUAGES

Certifications Web Design for Everybody: Basics of Web Development and Coding Software Development Lifecycle CertNexus Certified Ethical Emerging Technologist Google Project Management	English Intermediate - able to communicate and read technical documentation	Work Modes Onsite, hybrid, or remote Status Open to work and freelance projects
